

Researchers at the University of Maryland  
and Boston College need your help!

# TRY THE KIDTALK APP

KidTalk is a Citizen Science project investigating the ways social distancing and school closures are affecting child language development.

The KidTalk app lets families collect recordings of their children's speech in a "language scrapbook," helping researchers document language development and helping parents save precious memories for years to come.

Start your language  
scrapbook at  
[kidtalk.app](https://kidtalk.app), or visit  
[kidtalkscrapbook.org](https://kidtalkscrapbook.org) to  
learn more!
